Subject: RE: Further review of offenders on 2 row at Hodge

Dr. Wright,

One thing Ms Moore failed to mention was that the 81 offenders on 2-Row that were identified to be potentially "at risk" due to medication/medical condition/age were ranked by Nursing staff/ Mr. Lofton into one of three categories. While 75 have been moved, the six offenders that have not been moved (to date) are among those to be considered to be at less risk.

We will continue efforts of finding housing for these offenders in other areas, as well as continue to identify other offenders that are at potential risk due to the extreme heat that we have been experiencing in East Texas. All HSM-18 and PULHES of the Hodge offenders are also being reviewed.

Billy

Subject: Further review of offenders on 2 row at Hodge

Dr. Wright and Dr. Adams,

Per your request, I have been reviewing additional offender medication and conditions to determine if any other offenders need to be moved down from 2 row. The problem I have, however, is that we managed to identify only 75 offenders on 1 row who could feasibly be moved to 2 row (from a medical standpoint). We had already identified 81 offenders on 2 row on anti-psychotics. Since we already have more to move than can be moved, I don't know that identifying additional conditions is going to do any good, since there is no place to move them to. If you would like me to continue with the identification, I will do so, but would like your guidance first before I spend all the time on this and it ends up being completely unnecessary or wasted information.

I have also researched to determine if the 3 deceased offenders had recreated the day of their death or transfer off-site. The facility maintains records only on the total number of offenders recreating. They do not keep records of the names of the offenders recreating. As such, there is no way to know, without trying to find a particular staff member that might remember whether or not the offender did turn out to recreation. If you would like for me to try to get this information, please advise.
